GEN, CANBY SHOT DEAD BY CAPIAIN

The long pending troubles with the

Modee savages in the Oregon lava beds have culminated, as many anticipated, in treachery and murder. But the annonncement of the tragedy which was enacted on Friday morning last, and which is detailed in the following dispatches, is none the less startling and terrible. In pursuance of the policy of the government to seek negristerily a to the Pacific coast and asset the government to seek, persistently a peaceful solution of the troubles, and to refrain to the utmost limit from further hostile movements, General Canby, commanding the departments of the Pacific, accompanied by pence commissioners A. B. Mencham, A. Dyer and Rev. Dr. E. Thomas, with a friendly Indian and his squaw for interpreture, accepted a proposition of Captain Jack, the rebellious Monor chief, to meet him and live other Indians between the opposing lines to treat upon terms of surender. The result of the interview was the rejection of the terms offered, the sudden attack of the Indians upon the party, and the murder of Gen. Canby and Dr. Thomas, the serious wounding of Mr. Meacham, and the escape of Mr. Dyer and the Indian interpreter and his squaw. The following are the details of the tragedy as far as received by telegraph:

An error too common with practical rough cians, and frequently expressed by our performers is, that intricate music is the most cientific. As every rule that governs the arrangement of music has for its basis a fixed law of nature, a fundamental of the science, and consequently that which mearest accords with nature is the most scientific, the reverse true. The only way to estimate harmony is by its nearness to the demands of natura appreciation. The plainest chords with but ew changes by modulations or the introduc-

The progressions that are the most rejentific and least faulty are such as have been found by experiment to be most pleasing to the cultivated musical car; and the rules that govern them condemn and disallow the too frequent use of dissonance (the result of the use of accidentals, generally,) and unnecessary transitions. Skill may be displayed in the preparation and resolu tion of discords-the use of only permissive rules in progressions, &c.; but the musi
